

Octane Booster

Art. no	Volume	Items per unit	Items per pallet
AD02250	250 ml		
AD02999	1000 L		

Description

MPM octane booster is developed to boost the octane number by 2-4 points.

Main Benefits

- Increases octane number.
- Prevents exhaust valve seat recession.
- Improves and enhances the engine and combustion performance.
- Eliminates rough idling and engine hesitation.
- Prevents spark plug fouling.

Application

For all petrol engines with injectors or carburetor running leaded or unleaded fuel.

Suitable for use with vehicles fitted with catalytic converters.

Instruction

The contents of one 250 ml bottle will treat 40 to 60 litres of fuel.

Pour contents of bottle in the fuel tank preferable before refueling with petrol.

Typical Characteristics

Density	0,776	Kg/l
Colour	Clear / amber	
Flash point	~61	°C
